East Georgia College Bobcats Athletics

Prior to the adoption of intercollegiate athletic programs at East Georgia College, many of our area's most promising young student athletes were denied the benefits of competing on the intercollegiate level. Many were overlooked by larger schools from other areas and some, either through choice or because of circumstance, were unable to leave home to fulfill their dreams. There are too many stories of young athletes who gave up on education all together when sports were taken out of the picture. East Georgia College is working to make those young peoples' dreams become a reality through our athletic programs.

EGC believes that athletics are integral components of the educational, cultural and physical experience of today's students, and competition can become an arena for community involvement and civic pride. East Georgia College believes that the lessons learned through competition in athletics can provide lifelong benefits for our students and that many of life's most important lessons are learned outside of the classroom. Built on a foundation of teaching discipline, teamwork, and hard work as a means to success, our athletic department strives to be a launching pad to success for the young people we serve. Athletics at EGC add a new dimension to the college experience for all of our students, changing the fabric of their relationship with the College and helping us to recruit and retain top students and faculty. Bobcat Athletics will enhance the sense of tradition and legacy that our students have with the College, creating a new generation of alumni who feel a close connection to EGC.
